Fraunhofer at Medical Center Mannheim

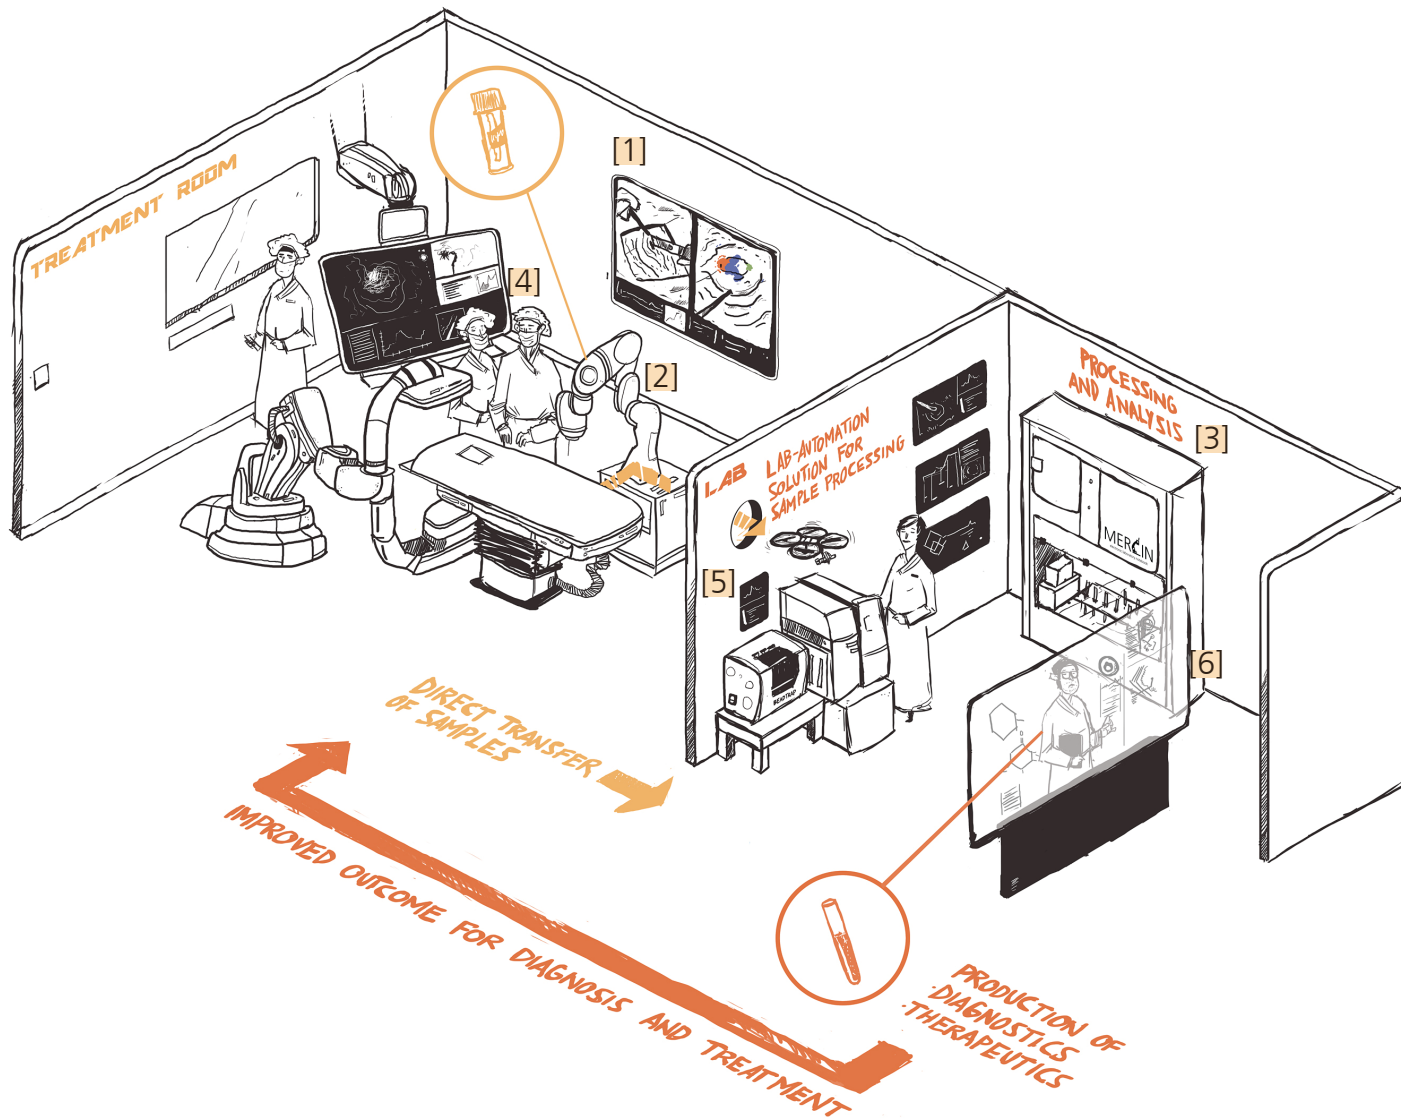

Our Expertise

The Project Group for Automation in Medicine and Biotechnology is characterised by years of expertise in the fields of industrial automation technology and development of devices, instruments and software. Our customers and partners benefit from the combination of scientific innovation and subsequent implementation into the area of medicine and biotechnology. Our vision includes wide-ranging consid-

erations about intervention room and laboratory and the systematically networking of devices and instruments.

- [1] Biomedical Optics
- [2] Devices and Instruments
- [3] Laboratory Automation
- [4] Human-Machine-Interface/Interaction
- [5] Bioprocess Engineering
- [6] Information Systems
